PIONEERING
THE LNG INDUSTRY

Operator of LNG terminals since 1965
Elengy, an ENGIE subsidiary, is a committed player in the development and transformation of the LNG (liquefied natural gas) market. This ambition is based on expertise and knowledge that has been built up over the course of more than 50 years. It also relies on the strength of the relationships established with our customers and partners, guided by the requirements of ethics and transparency.

Three LNG terminals
Elengy operates three terminals in France: Montoir-de-Bretagne on the Atlantic coast, and Fos Tonkin and Fos Cavaou on the Mediterranean coast. It has full ownership of the first two while Fos Cavaou belongs to its subsidiary, Fosmax LNG, in which Elengy is a majority shareholder.

New LNG services
In response to the developments in the LNG market, Elengy is breaking new ground and providing its customers with quality services at the lowest possible cost: intra-day flexibility, reloading of standard vessels, transshipment, loading of small LNG carriers and tanker trucks.

International partnerships
The strong growth in demand for LNG is accelerating the construction of LNG facilities across the world. That is why Elengy, in accordance with the ENGIE group strategy, leverages its expertise in operating and managing assets by means of strategic partnerships, particularly in Asia and the Middle East.
SAFETY AT THE HEART OF OUR TERMINALS

SAFETY ISRS 8
Level 7 of the DNV standard

ENVIRONMENT ISO 14001
for the environmental management of activities

QUALITY ISO 9001
for the activities allowing the reception of LNG carriers, the regasification of LNG, the loading of LNG tanker trucks and odorisation of send-out gas

Since 1965, our three terminals have welcomed more than 9,200 LNG carriers without any major industrial accident. In order to guarantee this safety, Elengy is implementing an integrated management system recognized by a triple certification for all of its terminals. This management system involves every employee as well as all stakeholders and the contracting companies in particular.

Fos Tonkin
Commissioned: 1972
Storage capacity: 150,000 m³
Regasification capacity: 3 Gm³/year
Maximum capacity of vessels accommodated: 75,000 m³
One berth

Fos Cavaou
Commissioned: 2010
Storage capacity: 330,000 m³
Regasification capacity: 8.25 Gm³/year

Montoir-de-Bretagne
Commissioned: 1980
Storage capacity: 360,000 m³
Regasification capacity: 10 Gm³/year
Maximum capacity of vessels accommodated: 266,000 m³
Two berths

Maximum capacity of vessels accommodated:
266,000 m³
One berth
Consultancy, technical assistance, due diligences, opportunity and feasibility studies, the development and management of projects, permitting, marketing, safety, operations, interface management... Elengy exports its know-how to support the rapid expansion of LNG throughout the world.
In order to support the rapid developments in the LNG market, Elengy permanently optimizes its LNG terminals, expanding its service offering and developing innovative, safe and competitive solutions: transshipment, division of cargoes, retail LNG, etc.

**Cargo reception and regasification**
- Receiving LNG tankers
- Unloading of LNG in terminal tanks
- LNG regasification

**Retail LNG**
- Tanker trucks loading
- Loading of small LNG carriers and LNG barges under development

**Ship reloading**
- Vessel reloading from terminal tanks
- Two-day stopover for an LNG cargo of 150,000 m$^3$

**LNG transshipment**
- Direct transfer of LNG between two vessels via the two berths
- Two-day stopover for an LNG cargo of 150,000 m$^3$

**Expertise and services**
- Gas quality and LNG ageing studies
- LNG carrier compatibility study and Vetting
- SIRE inspection
- Pre-feasibility studies, etc.

**Development of projects and business interest**
- Strategic partnerships or support for land-based or floating LNG terminal projects abroad
COMMITTED EMPLOYEES FOR A COMMITED COMPANY

Developing human capital
Professional training contracts, skills training, accreditation for work experience, mobility support, equal opportunities, disability agreement... Elengy places the enhancement of its competencies at the heart of its growth strategy. By integrating the Diversity standard, Elengy is capitalizing on its good practice and committing to the improvement of the actions already undertaken.

Reducing our environmental footprint
A goal which is based on the implementation of a program of specific actions: the continuous improvement of processes, the preservation of natural environments and biodiversity, etc.

Getting involved on the ground
More than 50% of subcontracted work and the procurement of terminal supplies are entrusted to local companies. For maintenance and renovation works, Elengy calls on local stakeholders, supporting their integration and employment. Elengy also encourages staff participation in the charitable activities which the company partners.

Nearly 400 employees work on the various Elengy sites: women and men with integrated individual career paths within the dynamics of a human-scale company project which is both ambitious and responsible. Every team is mobilized each and every day to support growth and strengthen performance.
