ELENGY  
INTERNATIONAL  
TRAINING OFFER

Training for all LNG terminal  
related operational activities

A company of  ENGIE

# ELENGY: 50 YEARS OF EXPERTISE

As an LNG owner and operator since 1965, Elengy has earned a reputation as an industry expert and a trusted partner. We provide our customers with a wide range of high-quality services and continually develop new innovations to support the growth of LNG around the world. Our belief is that no growth is sustainable without a permanent dedication to training.

## A TRUSTED EXPERT IN LIQUEFIED NATURAL GAS

- ▶ Over 50 years of experience in LNG management and development.
- ▶ Operator of three major terminals in France.
- ▶ At the forefront of LNG innovation, with services including small-scale LNG and transshipment.
- ▶ First-class safety record, with over 9,000 LNG tankers unloading operations without notable incident.

## A TRACK RECORD OF SUCCESSFUL TRAINING

**Since 1978, we have been training operators in a wide range of specialities:**

- ▶ Trained operators of 4 liquefaction plants for Sonatrach (Algeria).
- ▶ Trained staff of the first LNG receiving terminal for Kogas (Korea).
- ▶ Trained lab technicians in fiscal metering at Statoil (Norway).
- ▶ Long-term partnership with Petronet LNG (India) to train fire-fighting staff & provide technical assistance.

## PRACTICAL TRAINING COURSES CUSTOMIZED TO YOUR NEEDS

- ▶ Choose from a comprehensive range of courses.
- ▶ Let us customize training modules to the specific needs of your crews and plants.
- ▶ Benefit from practical advice and insights from skilled professional operators.
- ▶ Experience hands-on training with teams working on shifts. Discover real-life operation and maintenance on site for both small- and large-scale activities.

# OUR TRAINING COURSES

From theoretical lessons and technical courses to onsite experience and hands-on sessions, Elengy offers a full range of training modules for managers, shift supervisors, operations engineers, LNG truck drivers, and more.

## Need tailor-made training?

We'll work with you to build a training course that perfectly suits your needs.

We can provide in-house training on request.

### LNG course for managers

- Get an overview of the LNG chain
- Understand the main techniques in LNG re-gasification and shipping
- Learn about the design of an LNG terminal, including safety and environmental requirements

### LNG course for operation teams

- Get an overview of the LNG chain
- Understand the main techniques in LNG re-gasification and shipping
- Learn about the design of an LNG terminal, including safety and environmental requirements

### Operation and maintenance

- Become familiar with an operational LNG regasification plant
- Develop a practical understanding of the plant
- Develop an awareness of safety challenges

### Operation (advanced)

- Learn how to become an efficient and responsible LNG plant operator
- Understand the practicalities and real-life situations facing operations teams
- Get concrete experience of work as a full member of an operations team

### Maintenance (advanced)

- Experience maintenance activities under the guidance of a skilled LNG operator
- Develop a practical understanding of maintenance activities and challenges
- Observe maintenance teams working on site

### Fire-fighting

- Get an overview of LNG fire-fighting, including practical advice about different types of fires and how to fight them
- Experience hands-on LNG fire-fighting on a real-life scale

### Fiscal metering

- Learn how to undertake custody transfer measurement of a cargo & sample analysis in a terminal laboratory

### Laboratory chemist

- Undertake laboratory measurements using real LNG samples

### LNG ship-shore interface

- Learn about shipping & harbour procedures and regulations
- Understand the ship-shore interface on an LNG terminal

### Safe handling of small-scale LNG

- Get an understanding of LNG, based on the example of tanker truck loading
- Discover the principles for ensuring safety in small-scale LNG operations
- Experience LNG fire fighting
